Equipment Donations

Supporting Our Community Through Thoughtful Donations

At Pinarc, we are grateful for the generosity of individuals looking to donate equipment to support people with disabilities. To ensure the safety, quality, and appropriateness of donated items, we have established the following donation guidelines.

What We Accept:

- Equipment that is less than 5 years old
- Non-electronic equipment in good working condition and not missing any essential parts
- Items that do not require immediate or ongoing modifications, servicing or repairs
- Equipment that aligns with our therapy and support services

What Equipment Requires Additional Consideration:

Electronic equipment donations are not automatically declined. Each item will be assessed based on:

- Condition and age of the equipment
- Availability of an instruction manual and original charger (if applicable)
- Potential benefit to our clients
- Manufacturer or purchase date verification

If an electronic item does not meet our criteria, we are not able to accept it but may suggest alternative donation options.

Donation Process:

If you have equipment you'd like to donate, please provide the following information:

1. Description of item (make, model, size)
2. Age of the equipment
3. General condition
4. Any modifications or repairs
5. Photos of the item
6. Original invoice (if available)
7. Operating manual (if applicable)

Alternative Donation Pathway:

- If we are unable to accept your item, we may be able to connect you with families in need.
- We do not store donations indefinitely but can facilitate direct contact between donors and potential recipients.
- Once items are donated and Pinarc have provided to another family, items cannot be requested to be returned.

For more information or to inquire about donating, please contact us at admin@pinarc.org.au
